

Removing Delphi MyFi XM2GO Battery Cover

This guide demonstrates the removal of the battery cover which is necessary for working on the internals of the device.

Written By: Scott Byer

Step 1 — Removing Delphi MyFi XM2GO Battery Cover

- Flip the Delphi MyFi XM2GO Device on its back to start the cover-removal process.
- The back cover is the access point for the user-removable battery. Removing the back cover also gives the user access to the hard-reset button.

Step 2

- Locate the large button on the top back of the device. This button is used to release the latch holding the sliding back cover in place.
- Press this button at the top while making a firm grip on the battery cover.
- As the button is pressed, move the cover towards the bottom of the device while applying moderate pressure to the cover.
- Be careful to not press down too hard on the battery cover as it is made of plastic.
- The battery removal tab may pop up during the cover removal process.

Step 3

- After the cover is removed, the white Lithium Ion battery is visible.

To reassemble your device, follow these instructions in reverse order.
